**Research Training**

2KL2TR001446-06A1 NIH New York University Grossman School of Medicine (\$198,000)

Clinical and Translational Science Award Mentored Career Development Award. The goal of this postdoctoral K award is to prepare clinician scientists to develop a program of research to improve health equity and translate research into practice.  
Role: KL2 Scholar 1/1/2021 - 12/31/2023

T32NR008346 NIH/NINR Yale School of Nursing (\$90,000)

Research Training Self and Family Management  
This pre- and postdoctoral training program aims to prepare a cadre of independent investigators who provide critical evidence for improving the self and family management of chronic conditions.  
Role: Postdoctoral Fellow 9/1/2015-8/31/2017

NINR Intermural Research Training Award Precision Health Boot Camp: Smart Technologies, Smart Health.

This training explored the state-of-the-art of digital health, including the use of wearables, sensors, and virtual/augmented reality; the use of omics data in health care; and the creation of an interactive system for using health data. In addition, they discussed strategies for research and identified opportunities for and challenges to using digital health.  
Role: Training Participant 7/23/2018 – 7/27/2018

NINR Intermural Research Training Award Precision Health Boot Camp: Big Data

This training provided a foundation in data science, focusing on methodologies and strategies for incorporating novel methods into research proposals. The course featured lectures by distinguished guest speakers, classroom discussion, and hands-on training with real-world Big Data.  
Role: Training Participant 7/25/2016 – 7/29/2016

NINR Intermural Research Training Award Summer Genetics Institute (SGI)

Participants learned from some of the world's leading genetics and genomics experts.  
Hands-on lab training allowed participants to use the latest tools and techniques, such as extracting DNA and RNA, analyzing PCR and sequencing results, separating proteins by western blot and cells by flow

cytometry, and several other techniques. The cohort also participated in several networking events where former SGI alumni gave presentations on how they integrate genomics into their current research.

Role: Training Participant 6/1/2015 – 6/25/2015

**NINR Intermural Research Training Award: Fatigue Boot Camp**

This course covered topics relevant to fatigue and sleep research, including fatigue/sleep measurement, treatments, and genomics. Speakers included nationally and internationally known fatigue and sleep scientists from various institutions, including the NIH and universities across the United States.

Role: Training Participant 7/22/2013 -7/26/2013
